

## **CCSE Energy and Utilities Meeting Minutes**

**Date:** Tuesday, December 3, 2013

**Time:** 3:00- 4:00 p.m.

**Location:** Utilities Building (UTB), 1100 S Morgan St

### **Attendees:**

Rob Roman

Dave Hofman

Robert Rouzer

Mark May

Eduardo Muñoz

Vy Milunas

Cindy Klein-Banai

Shelby Egan

Aaron Mason (Hawkeye Energy Solutions)

### **Discussion/ Things that have been established:**

1. Idea of exploring an outdoor renewable energy testing/lab space on the roof of SEL.
  - a. This idea was proposed as a point of discussion amongst the group. The subcommittee tossed out the idea of the benefits of having an outdoor renewable energy testing/lab space on the roof of SEL. Such an ideal place would allow for a space where there could be different types of student lab based projects. This subcommittee will continue to discuss this further, and create a brief concept paper.
2. Updates on old business
  - a. Energy Dashboards
    - i. A presentation was given by Hawkeye Energy Solutions to show the design and layout of future dashboards. The subcommittee provided input and comments on content and design (how to find out more information on each building, average energy use, relatable information “powers this many cars”, “stadiums”, etc.)

### **Things we are continuing to work on:**

1. Create a draft concept paper to gain an understanding of who is interested in the discussion of what a green energy rooftop lab might look like
2. Progress on 2013 CCSE Report recommendations
