

CCSE Energy and Utilities Meeting Minutes

Date: Tuesday, March 25th

Time: 3:00-4:00 p.m.

Location: Utilities Building (UTB), 1100 S Morgan St

Attendees:

Rob Roman

Dave Hofman

Bob Deja

Vy Milunas

Mike Molnar

Rob Rouzer

Adali Ramirez

Cindy Klein-Banai

Ursula Malczewski

Edwin Flores

Shelby Egan

Discussion/Things that have been established:

1. Green Fee Project Proposal
 - a. Undergraduate engineering student, Ursula Malczewski, proposed a project called “Wind Flames”, a vertical axis wind turbine located on campus for renewable wind energy production. Student met with the Green Fee Advisory Board, who directed her to contact the CCSE Energy and Utilities subcommittee to gain insight and recommendations, a detailed budget with quotes, a letter of support and project oversight. The subcommittee agreed to assist with the letter of recommendation and oversight, but offered suggestions. These included having a cost-benefit analysis, a feasibility study and evidence that this project accounts for social equity and environmental education.

Things we are continuing to work on:

1. Assisting with “Wind Flames” Green Fee project proposal
2. Green Energy Rooftop Lab
 - a. Will be revising proposed idea, to address the issue of risk management.
